Fundus P7, every location: error of each donor in units of the dataset mean (contrast per map)

Own red range per map (2nd-98th percentile), darker = larger error; faded where two independent person halves disagree about the side of the median. P7: PAPILA expert-disc translation frame, GRAPE disc-fovea frame; green / background, z-scored in the field of view, masked Gaussian window (sd = 48/sqrt(12) px) on the 256 grid. Pre-QC.
