
R = (d - d_self) / (d_stranger - d_self): 0 = the target itself, 1 = unrelated person (mean of 16). Bars: 95% interval, bootstrap over people. Blue bands: expected side (partly correct rungs and averages below 1; wrong detail at or above 0.9; noise above 1).
frame P2 (Worldcoin open-iris segmentation): Kate accepted P2 on the trial and frame QC sheets on 7 Nov 2026 ('хорошо да берем'); the lid-shadow mask (z < -4 connected to the lid) was added after that and its final sheets are not yet re-shown to Kate
