Fundus, every location: pixel error against the dataset mean (pre-QC)

One scale: 1 = dataset mean (white), 2 = stranger; blue beats the mean. * neighbours chosen on a 4 px grid by the 8 px ring around the 16 px window. Mirror side: the other eye, reflected into the same orientation.
128 px frame, 16 px window; outside the field is missing. GRAPE P8, PAPILA P9 (Amendment 9.2); persons left out of their own pools. Both rows at one scale, set by the disc on each mean (radius GRAPE 5.2 px, PAPILA 5.6 px), discs aligned.
