Real brain, every location: pixel error ranks the dataset mean above related anatomy (contrast per map)

Own range per map: 2nd-98th percentile around its median (white); faded where two independent family halves fall on opposite sides of the median (look-alikes: not yet, halves pending).

* 8 mm grid, neighbours chosen by the 4 mm shell only. QTIM session 1, 16 mm window. Pre-QC, affine registration only.
