From observed anatomy to population references

Source cohorts and controlled donor comparisons

Brain MRI / QTIM P

221 targets / 168 families

23 repeat scans; Gaussian maps

Face photos / CelebA F

921 targets / 921 clusters

v6f frame approved

Fundus photos / GRAPE P8 P

239 eyes / 134 people

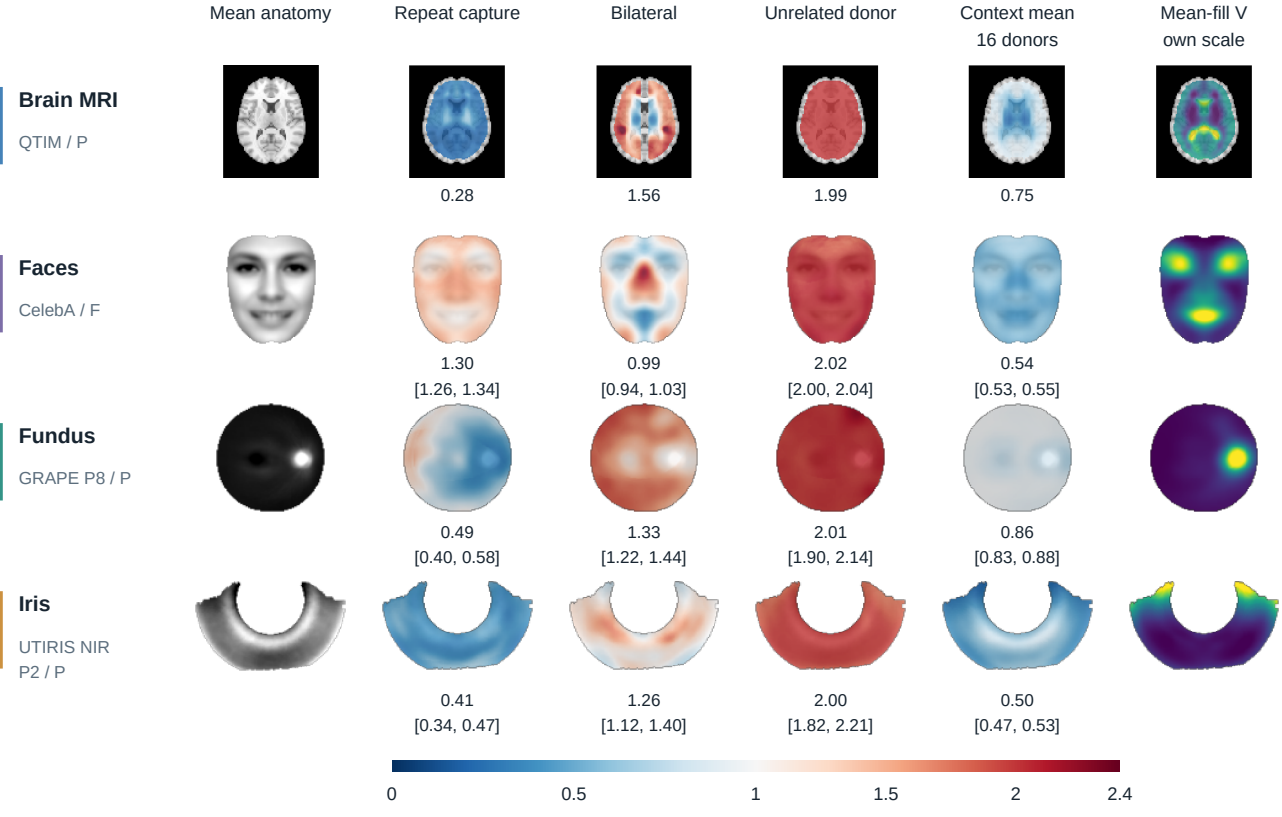

Repeat: 171 eyes / 97 people

Iris images / UTIRIS NIR P

156 eyes / 78 people

P2 strip panel; same-eye repeats

Observed donor differences / one primary dataset per modality

Local error / mean-fill error (Q); white = 1. V: own scale. P: provisional; F: approved frame.
